Innehåll

The course is problem-based, which means that students are expected to independently develop solutions to different problems for financial institutions. The problems are structured as cases and encourage the student to use a variety of analytical tools and research findings to problematize the solutions. The cases give both extensive and deep knowledge about analyzing banks.

The content of the cases are concentrated to:

- The structure and the role of financial institutions and markets.
- Financial statement analysis and performance measurement of financial firms.
- Risk Management in banking.
- ALM (Asset and Liability Management).
- Corporate financing through financial institutions.

- Pricing in financial markets.
- Pricing of financial services.
