

Course syllabus

Faculty Board of Science and Engineering

School of Engineering

1BY032 APU, Arbetsplatsförlagd utbildning - Byggteknik, 7,5 högskolepoäng

1BY032 Internship - Civil Engineering, 7.5 credits

Main field of study

Civil Engineering

Subject Group

Building Technology

Level of classification

First Level

Progression

G1F

Date of Ratification

Approved by Organisational Committee 2009-07-24

The course syllabus is valid from spring semester 2010

Prerequisites

Basic eligibility and 7.5 credits within the civil engineering or other engineering area.

Objectives

After completing the course the student is expected to have acquired

- an insight into how the actors and work places of the construction industry are organized in the construction process
- an experience of applied civil engineering
- the possibility to reflect on individual and professional development

Content

The course comprises:

- 20 work days' active attendance at the work place
- the compilation of a report including the documentation/investigation of a construction engineering problem
- literature search
- report presentation at a final seminar

Type of Instruction

The course is offered in cooperation with actors in the construction process.

Independent report-writing work Supervision provided by a contact person in the work

place as well as by a teacher in the course.

The student is expected to actively search for knowledge in the work place, during seminars and supervision hours.

Examination

The course is assessed with the grades Fail (U) or Pass (G).

The examination involves the assessment of the student's seminar report and of documented work-place attendance.

Course Evaluation

When the course has finished, an evaluation is compiled. The results are reported to the students and then archived according to the rules of the school.

Required Reading and Additional Study Material

Required reading

Selected in consultation with the supervisor of the seminar report
