Linnæus University

Course syllabus

Faculty Board of Science and Engineering
School of Computer Science, Physics and Mathematics

1DV429 IT-Säkerhet, 7,5 högskolepoäng
IT Security, 7.5 credits

Main field of study
Computer Science

Subject Group
Informatics/Computer and Systems Sciences

Level of classification
First Level

Progression
G1N

Date of Ratification
Approved by the Board of the School of Computer Science, Physics and Mathematics 2009-06-23

Revised 2010-08-20. Revision made for English translation of the syllabus and course evaluation.

The course syllabus is valid from spring semester 2011

Prerequisites
General entry requirements and Mathematics B and Physics A (Field-specific entry requirements 7).

Expected learning outcomes

After completing this course the student should have basic knowledge in the following areas:

- the concept of IT-security
- PC-security
- network security
- the external and internal threats that can affect a system
- personal firewalls and antivirus software
- physical and environmental security related to SS-ISO/IEC 27002
- threats against wireless networks WLAN)
- how security is planned and controlled.

Furthermore, the student will acquire tools and methods to be able to respond critical and analytical to problems in the information security field.

Content

The course contains both theoretical aspects with practical. Laboratory work are carried out on the theoretical aspects of the course. In these lab works the students faces problem that must be solved either in group or individual.

Covered areas within the course:

- PC-security
- network security
- internet security
- hackers and their methods
- malicious software – types and consequences
- physical security
- information security.

Type of Instruction

Teaching consists of lectures and laboratory exercises. Participation in laboratory work is mandatory.

Examination

The course is assessed with the grades U,3,4 or 5.
For laboratory work the grades are G (pass) and U (fail). For the exam the grades are U (fail), 3, 4, 5. To obtain final grade the student must have attained G (pass) on laboratory work and lowest grade 3 on exam.

On request, students may have their credits translated to ECTS-marks. Such request must be sent to the examiner before the grading process starts.

The student should be offered a new examination within six weeks, under the regular semester periods. The number of examinations is limited to five times.

Course Evaluation

A course evaluation will be carried out at the end of the course in accordance with the guidelines of the University. The result of the course evaluation will be filed at the department.
