Department of Computer Science and Media Technology

1ME322 Webbteknik 2, 7,5 högskolepoäng

Web Technology 2, 7.5 credits

Main field of study

Media Technology

Subject Group

Media Production

Level of classification

First Level

Progression

G1F

Date of Ratification

Approved 2014-12-02

Revised 2020-08-06 by Faculty of Technology. Literature list is revised.

The course syllabus is valid from autumn semester 2020

Prerequisites

NO VALUE DEFINED

Objectives

Upon completion of the course the student should:

- be able to use a client-based script language to enhance the user experience on web sites
- master methods for design of object-based, event-driven programs in a client-based script language to create dynamic and interactive web sites

Content

The course consists of the following parts:

- fundamental programming in script languages (JavaScript)
- dynamic management of information on the web – combination of HTML, CSS, JavaScript and DOM
- object-based and event-driven programming
- interactivity and dynamic effects on web pages
- debugging of code with a debug tool

Type of Instruction

The teaching consists of lectures, laborations and seminars.

Examination

The course is assessed with the grades Pass (G), Pass (G) or Pass with Distinction (VG).

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

The examination consists of submission on mandatory hand in assignments. These must be submitted by the due date.

In order to pass, the objectives of the course should be achieved.

Course Evaluation

A course evaluation will be carried out and compiled after the course is completed. The compilation will be presented to the current board as well as to the students and filed.
