## Objectives

On completion of the course, students should be able to:

- account for the main features of Swedish civil and commercial law
- find and analyse legal material that is relevant to the course, such as legal preparatory work, law and material from other legal sources
- identify the following legal fields: intellectual property law, civil law, contract law, sales law, tort law, labour law, corporate law, marketing law, real estate law as well as enforcement law and creditor rights
- solve simpler legal problems within the above mentioned legal fields

## Content

The course begins with an overview of the Swedish legal system's structure and a run-through of basic legal method.

Thereafter, the course contains a basic run-through of intellectual property law, civil law, contract law, sales law, tort law, labour law, corporate law, marketing law, real estate law as well as enforcement law and creditor rights. Students also receive supervision in information retrieval as regards legal source material.

## Type of Instruction

Teaching is in the form of lectures and seminars. Obligatory elements will be shown in

the class schedule.

### Examination

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

The course is examined through a written test.

Results are graded using one of the terms Passed with distinction, Pass or Fail, and A-F according to the ECTS scale.

For the grade pass, the objectives have to be reached; the grade is based upon the degree to which the objectives are met. The weighing of the grades to the course grade is following the principles in the document "Principer för betygsrapportering dnr ELNU 2011/160".

Students who do not achieve a satisfactory result in the examinations are permitted to make a second attempt approximately 5-8 weeks after the normal examination date. The student will have a minimum of five occasions for written exams in relation to the syllabus to which the student was accepted. Usually 3 occasions per academic year.

### Course Evaluation

A written course evaluation is carried out and compiled in a report, which is archived at the faculty. The results and possible measures taken are communicated by the course coordinator and presented to the students the next time the course is given, or in another way deemed suitable by the course coordinator. Other types of course evaluations, for example regular evaluations throughout the course or discussions with students, will be included and encouraged with the aim of ensuring continuous quality development.
