

## Course syllabus

Faculty of Social Sciences

Department of Education and Teachers' Practice

1UV302 Utbildningsvetenskaplig forskningsmetod, 7.5 credits  
Applied research methods in education

### **Main field of study**

Educational Sciences

### **Subject Group**

Education

### **Level of classification**

First Level

### **Progression**

G1F

### **Date of Ratification**

Approved by Faculty of Social Sciences 2020-02-24

The course syllabus is valid from autumn semester 2020

### **Prerequisites**

General entry requirements, English B and 30 credits in a subject with relevance to the teacher training programme.

## Objectives

After completing the course, students shall be able to:

- plan and carry out an academic study within a field relevant to the profession
- collect data and interpret, analyse and communicate the results
- critically examine and constructively discuss fellow students' studies
- defend their own studies at a seminar

## Content

The study is carried out and documented within the field of Educational Sciences. The systematic approach is enhanced by means of conducting a minor study in groups. The project also includes planning and carrying out a study, as well as processing and analysing data within an educational field, which shall later be communicated in writing as well as orally. Students shall also carry out a public discussion and examination where they act as the external reviewer for a fellow student's study as well as defend their own.

## Type of Instruction

Teaching consists of literature studies and seminars.

## Examination

The course is assessed with the grades A, B, C, D, E, Fx or F.

Grade A represents the highest grade, and the subsequent grades follow in descending order, where grade E is the lowest grade that qualifies as a Pass. A grade of F means that the student's performance is assessed as Fail. Fx is not a grade and is only used when a student is permitted to supplement his/her examination. Students who have not passed (i.e. received the grade of F) at the scheduled examination will be offered a new examination shortly after the scheduled examination date.

Examination takes place by presenting the study (in writing as well as orally) and by acting as the external reviewer for a fellow student's study at a final seminar.

In order to receive a grade of Pass in the course (E), the course objectives must be attained.

## Course Evaluation

A course evaluation is carried out either during or at the end of the course. Results and analysis of the evaluation are presented to the students who have completed the course as well as to new students at the following course date. The course evaluation is conducted anonymously.

## Credit Overlap

The course cannot be included in a degree along with the following course/courses of which the content fully, or partly, corresponds to the content of this course: 1UV301, 5 credits

## Other

Information about the grading criteria for the A-F scale is given in a separate document in connection with the start of the course, at the latest. Any additional costs which may arise in connection with the course are paid for by the students themselves.
