

Course syllabus

Faculty of Technology

Department of Physics and Electrical Engineering

2ED383 Antennteknik, 7,5 högskolepoäng

Antenna technology, 7.5 credits

Main field of study

Electrical Engineering

Subject Group

Electrical Engineering

Level of classification

First Level

Progression

G2F

Date of Ratification

Approved by Faculty of Technology 2015-05-22

The course syllabus is valid from spring semester 2016

Prerequisites

At least two years of study in electrical engineering (120 credits) incl. the courses Radio engineering, 7,5 higher education credits (2ED092) + Mobile radio communication, 7,5 higher education credits (2ED103) or the equivalent.

Objectives

The course introduces antenna technology. The student is expected to combine knowledge of mathematics and electromagnetics in order to obtain an overview of a field of application that is based on electromagnetics.

Content

The course comprises the following topics:

- Elementary vector analysis
- Basic electromagnetism
- Antenna concepts
- Maxwell's equations
- Wire antennas, dipoles
- Array antennas

Type of Instruction

Teaching consists of lectures.

Examination

The course is assessed with the grades A, B, C, D, E, Fx or F.

The grade A constitutes the highest grade on the scale and the remaining grades follow in descending order where the grade E is the lowest grade on the scale that will result in

a pass. The grade F means that the student's performance is assessed as fail (i.e. received the grade F).

Written exam.

Course Evaluation

During the course or in close connection to the course, a course evaluation is to be carried out. The result and analysis of the course evaluation are to be communicated to the students who have taken the course and to the students who are to participate in the course the next time it is offered. The course evaluation is carried out anonymously. The compiled report will be filed at the Faculty.

Credit Overlap

The course cannot be included in a degree along with the following course/courses of which the content fully, or partly, corresponds to the content of this course: 2ED083 Antenna technology, 7.5 credits

Other

Grade criteria for the A–F scale are communicated to the student through a special document. The student is to be informed about the grade criteria for the course by the start of the course at the latest.

Required Reading and Additional Study Material
