## Objectives

On completion of the course, students should be able to:

- identify, demarcate and formulate a problem with scientific relevance
- account for and motivate their choice of method and demonstrate an understanding for its consequences
- account for, motivate and apply the chosen problem relevant socialscientific method
- identify and work with relevant theoretical frames of reference, as well as utilise it for the analysis of the problem and the compiled empiricism
- write and defend a scientifically based thesis
- independently and actively carry out a constructive opposition on another student's degree project

## Content

The course contains:

- various perspectives on science
- approaches to method, empiricism, theory and text production
- problem discussion and problem formulation
- writing a degree project and the conclusions
- opposition against another degree project

## Type of Instruction

The teaching consists of web-based seminars and tutoring. Participation at the seminars is mandatory.

The student is only entitled to tutoring during the course period.

## Examination

The course is assessed with the grades A, B, C, D, E, Fx or F.

The assessment of student performance is done by assessing the degree project and opposition.

A degree project that is not assessed to possibly fulfill the requirements at the final tutoring is recommended not to be treated at the originally scheduled final seminar.

The grade A constitutes the highest grade on the scale and the remaining grades follow in descending order where the grade E is the lowest grade on the scale that will result in a pass. The grade F means that the student's performance is assessed as fail.

After each regular examination there will be at least one new examination in close proximity to the date the results of the regular exam were posted. A minimum of five occasions for written exams will be offered in relation to the syllabus to which the student was accepted. Usually three occasions per academic year are offered. Students that fail reports can complement after instructions from the examiner to obtain a pass grade.

Grading criteria for the A–F scale are communicated in writing to the student by the start of the course/module at the latest, as well as how grades on separate elements of examination are weighed to a final course grade.

## Course Evaluation

During the implementation of the course or in close connection to the course a course evaluation is to be carried out. Result and analysis of the course evaluation is to be presented as feedback both to the students who have completed the course and to the students who are to participate on the course the next time it is offered. The course evaluation is to be carried out anonymously.
