

Course syllabus

Faculty of Technology

Department of Informatics

2IK50E Examensarbete i informatik på kandidatnivå, inriktning interaktionsdesign, 15 högskolepoäng

2IK50E Degree Project in Informatics at Bachelor Level, Specialization in Interaction Design, 15 credits

Main field of study

Informatics

Subject Group

Informatics/Computer and Systems Sciences

Level of classification

First Level

Progression

G2E

Date of Ratification

Approved 2012-08-17

Revised 2017-11-13 by Faculty of Technology. Removal om ECTS-grading scale. The course syllabus is valid from spring semester 2018

Prerequisites

75 credits within the subject area Informatics including minimum of 15 credits at the progression level G2F or equivalent, and the course 2IK400 Project Work and Philosophy of Science, 7,5 credits.

Objectives

Upon completion of the course, the student should be able to:

- formulate research problems related to a practical problem
- identify and refer to previous research and theories
- plan and conduct an empirical study by using at least one scientific method
- analyze and process empirical data in accordance with the research questions
- present the obtained results both in writing and orally
- conduct a critical evaluation of the own and other students' work and results, concerning scientific, social and ethical aspects.

Content

The course comprises:

- Choice of a subject area for the degree project, based on the student's interest and in consultation with the course coordinator
- Definition of a relevant, topical and scientific research problem, based on previous research and possible practical assignments
- Literature search
- Data gathering and analysis
- Writing a report
- Oral presentation of the own work during the entire process
- Review and oral opposition of other students' work during the entire process

Type of Instruction

The course consists of independent work, either individually or in groups of maximum two persons. This work is supported by lectures, tutoring and seminars. If the project is carried out in a group, each participant must be able to account for his/hers individual contribution.

Examination

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

The grade is based on the individual performance. Basis for the grading is a written report, an oral presentation and opposition of a report and a description of the individual performance.

Course Evaluation

During the course or in close connection to the course, a course evaluation is to be carried out. The result and analysis of the course evaluation are to be communicated to the students who have taken the course and to the students who are to participate in the course the next time it is offered. The course evaluation is carried out anonymously. The compiled report will be filed at the Faculty.

Required Reading and Additional Study Material

Required Reading

Relevant course literature is selected in consultation with the tutor and the course coordinator.
