

Course syllabus

Faculty of Social Sciences

Department of Criminology and Police Work

2PX44U Polisiär yttre tjänstefärdighet IV, 3 högskolepoäng
Proficiency in patrol duty aspects of police work IV, 3 credits

Main field of study

Police Work

Subject Group

Other Subjects within Social Science

Level of classification

First Level

Progression

G2F

Date of Ratification

Approved 2016-08-24

Revised 2018-12-17 by Faculty of Social Sciences. Revision of objectives and content, and revision of the examination of POLKON.

The course syllabus is valid from spring semester 2019

Prerequisites

1PX11U Introduction to police work, 5 credits

1PX12U Basic police work, 7.5 credits

1PX13U Criminal law, 7.5 credits

1PX16U Police emergency care of acutely ill persons, 3 credits

1PX21U Criminology and crime prevention, 7.5 credits

1PX22U Criminal investigation, 11.5 credits

1PX23U Policing in a Global Context, 4.5 credits

1PX31U Juvenile crime, 4 credits

1PX32U Drug crimes and substance abuse, 3 credits

1PX33U Mental disorder, 4.5 credits

1PX14U Proficiency in patrol duty aspects of police work I, 3 credits

1PX24U Proficiency in patrol duty aspects of police work II, 3 credits

1PX35U Proficiency in patrol duty aspects of police work III, 3.5 credits

Objectives

Health

After completing the course, students shall be able to:

- describe the general work environment and health situation within the police profession
- on the basis of the acquired training in the subject of Health, develop and analyse an individual health profile

Public Order Policing

After completing the course, students shall be able to:

- exemplify in what ways the principles; facilitation, differentiation, information/knowledge, communication and self-policing can be integrated with operative measures within public order policing, as well as in everyday police situations
- apply in practice the methods used in relation to public order policing
- explain the legislation that forms the basis of public order policing
- present an idea of operation, that complies with the established national guidelines and based on a presented situation

Patrol Car driving

After completing the course, students shall be able to:

- drive the police vehicles in an efficient, careful and safe manner in narrow spaces

Radio Communication/Tactical Liaison Service

After completing the course, students shall be able to:

- use all the functions on the police mobile radio stations
- master the police maneuver system software (POLMAN)
- apply tactical liaison skills individually as well as part of a group/division, used at police commands

Police Conflict Management (Techniques and Methods, Basic Tactics, Firearms)

After completing the course, students shall be able to:

- apply the integrated tactical approach in relation to threats of violence or armed violence
- under the influence of physical strain and stress and in accordance with the legislation in force, apply the integrated tactical approach in an independent and flexible manner
- apply in practice established national methods at activities in situations involving an increased number of people
- analyse, assess and account for the correct measures, on the basis of legal and tactical conditions, in relation to solving various dilemmas and police situations as well as operations involving concealed carry and situations with poor lighting/in the dark
- account for the application of the Offensive Weapons Act
- account for and execute custody and control of firearms and ammunition.

Content

The course contains the subjects Public Order Policing, Health, Patrol Car Driving, Radio Communication/ Tactical Liaison Service, and POLKON/Police Conflict Management (here: police conflict management techniques and methods, firearms, and basic tactics).

Public Order Policing

The course presents conflict-reducing principles in relation to lectures on dialogue policing and the perspective of the counterpart. Students are given a theoretical specialisation in law; chapter 16 in the Police Act and the Public Order Act on public order policing. The methods are practiced and the conflict-reducing principles and the law in force are integrated in the exercises. Students are trained in using conflict-reducing methods in public order policing as well as in everyday policing. The applied exercise and seminars are compulsory.

Health

Health

As a final part prior to the traineeship, an individual health profile is developed and subsequently analysed and discussed. This health profile is based on all the studies in Health. The work environment and health promotion within the police are introduced in the fourth semester.

Patrol Car Driving

Applied exercises in more advanced driving and work from the patrol cars are conducted in the course, exercises that give the students a more general view of the police activities by positioning the vehicle correctly on the road, stopping and reporting in a roadworthy and exemplary manner. Supervised exercises are also conducted, aimed at attaining increased efficiency while maintaining the safety at low speed operations of vehicles in narrow spaces. Theoretical group work is performed prior to these exercises. The elements Vehicle positioning IV and Stoppage are compulsory.

Radio Communication/Tactical Liaison Service

The training is aimed at providing a national uniform working method for radio communication management. The course includes theory as well as practical application in radio communication rooms and outdoors. The subject is integrated into the exercise Police tactics included in the course 2PX52U Personal professional development in police work, in which some parts of the application of the knowledge field are practiced.

During the course, students acquire theoretical as well as practical knowledge of the police maneuver system (the software POLMAN). The liaison tactics that form the basis of the police commands as well as cross-regional critical events are also looked into. Students are through repetition given the opportunity to practice and develop their ability to handle all functions and settings on the mobile radio stations.

Police Conflict Management (Techniques and Methods, Basic Tactics, Firearms)

The emphasis is mainly placed on applied exercises in order for the students to learn how to independently assess, act and analyse situations of conflict. This is based on the relation to the integrated tactical approach within police conflict management and the established national methods. The exercises contain elements in which the students are subjected to strained situations involving making choices in terms of using violence with weapons, OC (pepper spray), batons, handcuffs and physical techniques and methods. The communicative approach is also practiced in order to be applied in conflict situations in a manner adapted to the situation at hand. Life-saving measures in the winter are also included if the course is given in the spring semester.

Students are given the opportunity to enhance and deepen their skills and knowledge of how to handle weapons, shooting and the legislation governing the legal conditions of using a service weapon. The students acquire knowledge of concealed carry, shooting in the dark and the use of Tritium sight devices and are given a review of the techniques and tactical use of flashlights. Compulsory component: Training in OC, regulated in the Swedish Police Authority's Regulations and General Advice (FAP).

Type of Instruction

Teaching is mainly conducted by the use of problem-based methodology. Knowledge acquisition in the components takes place through individual work, base group work, lectures and practical application. Practical elements are trained by the use of demonstrations, practical exercises, supervision and coaching.

Examination

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

Health

Examination of the component takes place by means of two seminars. In order to receive a grade of Pass, students are required to demonstrate that the intended learning outcomes are attained.

Patrol Car Driving

Examination of the component takes place through an applied exercise in Körgård (driving in a designated area). In order to receive a grade of Pass, students are required to demonstrate that the intended learning outcomes are attained.

Radio Communication/Tactical Liaison Service

Examination takes place by means of a combined written exam and a practical exam in a radio communications room where mobile radio stations are used. In order to receive a grade of Pass, students are required to demonstrate that the intended learning outcomes are attained.

Police Conflict Management (Techniques and Methods, Basic Tactics, and Firearms)

Examination of the compulsory element OC takes place by means of a web-based exam.

Examination of Police Conflict Management (Techniques and Methods, Basic Tactics, and Firearms) takes place by means of a practical exam focused on the integrated tactical approach. In order to receive a grade of Pass, students are required to demonstrate that the intended learning outcomes are attained. To be awarded a grade of Pass with Distinction, students are through the examination required to demonstrate special skills and understanding of the integrated tactical approach.

In order to receive a grade of Pass with Distinction in the entire course, it is required that the practical examination in police conflict management is assessed as Pass with Distinction and the other examinations as Pass.

Course Evaluation

A course evaluation is carried out either during or at the end of the course. Results and analysis of the evaluation are presented to the students who have completed the course, as well as to the students at the following course date. The course evaluation is conducted anonymously. The results are reported to programme council and filed by the Institute of police education.
