

## Course syllabus

School of Business and Economics

Department of Management Accounting and Logistics

2RV01E Rättsvetenskap, examensarbete (kandidat), 15 högskolepoäng

Legal Science, Degree Project (Bachelor), 15 credits

**Main field of study**

Legal Science

**Subject Group**

Law and Legal Studies

**Level of classification**

First Level

**Progression**

G2E

**Date of Ratification**

Approved 2009-06-17

Revised 2013-03-26 by School of Business and Economics. Replaces 2RV00E due to revision of title, advanced level and a change in eligibility. Also general review of changes in assessment methods, course evaluation, and content.

The course syllabus is valid from spring semester 2014

**Prerequisites**

Legal Science 75 credits, including at least 15 credits Negotiations in Theory and Practice or the equivalent

## Objectives

The aim of the course is for students to acquire more in-depth insight into a legal field by independently writing a degree project in Legal Science. Thereby, the students should develop their skills at written presentation and qualified investigative work.

On completion of the course, the student should be able to:

- identify, formulate and analyse legal problems within a legal field
- independently search for information and make a critical evaluation of it
- plan and conduct a qualified investigation
- account for and discuss the results of the investigation conducted, both in writing and orally
- consider, in their assessments, other scientific or societal issues
- identify the need for further knowledge of the field
- perform an analysis from the perspective of equality or diversity, as well as show how the issue in question can be placed in an international context

## Content

During the course, students will independently produce a written degree project. The degree project will be defended at a seminar. Each student will also act as opponent for another student's degree project.

Students will agree with their degree project supervisor or examiner on the subject for their degree project and the literature to be studied.

### Type of Instruction

Teaching is provided in the form of lectures, seminars and degree project supervision.

### Examination

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

To pass the course, the student must have completed a degree project corresponding to 15 credits.

Student performance will be assessed in connection with the student's presentation and defence of the degree project at a public seminar. The assessment also covers the student's acting as the opponent for another degree project. Defence and opposition are compulsory assessment components.

Results are graded using one of the terms Passed with distinction, Pass or Fail, and A-F according to the ECTS scale.

For the grade pass, the objectives have to be reached; the grade is based upon the degree to which the objectives are met. The weighing of the grades to the course grade is following the principles in the document "Principer för betygsrapportering dnr 2011/160".

A degree project that is not assessed to possibly fulfill the requirements at the final tutoring is recommended not to be treated at the originally scheduled final seminar. The degree project has to be reassessed at a new final review and considered fulfilling the necessary requirements in order to be presented at a later final seminar.

### Course Evaluation

A written course evaluation is carried out and compiled in a report, which is archived at the faculty. The results and possible measures taken are communicated by the course coordinator and presented to the students the next time the course is given, or in another way deemed suitable by the course coordinator. Other types of course evaluations, for example regular evaluations throughout the course or discussions with students, will be included and encouraged with the aim of ensuring continuous quality development.

### Required Reading and Additional Study Material

#### **Required reading**

The literature is selected in consultation with the tutor
