Department of Health and Caring Sciences

2VÅ630 Komplementär och alternativ medicin i ett vårdvetenskapligt perspektiv, grundnivå, 7,5 högskolepoäng

Complementary and Alternative Medicine in a Caring Science Perspective, First Level, 7.5 credits

Main field of study

Caring Science

Subject Group

Nursing Science

Level of classification

First Level

Progression

G2F

Date of Ratification

Approved 2012-04-18

Revised 2014-09-16 by Faculty of Health and Life Sciences.

The course syllabus is valid from autumn semester 2014

Prerequisites

Medical Sciences 30 credits

Caring Sciences 30 credits.

Objectives

On completion of the course, students should be able to:

- account for commonly occurring forms of complementary and alternative medicine, nationally and internationally as well as on the basis of a historical perspective
- problematize complementary and alternative medicine from a life world perspective and systems theory perspective
- critically examine and reflect over different complementary/alternative treatments in relation to current evidence
- be familiar with current provisions, laws and statutes that govern the use of complementary and alternative medical methods

Content

The course includes the following:

- different forms of complementary and alternative medicine national, international and historical perspectives on complementary and alternative medicine
- life world perspective and systems theory perspectives on complementary and alternative medicine
- evidence-based knowledge within the field
- provisions, laws and statutes that govern the use of complementary/alternative medical methods

Obligatory elements are specified in the course schedule.

Type of Instruction

- Individual work
- Lectures
- Group work
- Seminars

Teaching will be carried out either entirely or partly via the learning platform.

Examination

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

The course is examined through a written home examination and four seminars. For a grade of Pass, all expected learning outcomes must be fulfilled. For a grade of Pass with Distinction the written home examination must be Passed with Distinction.

A resit examination is offered in accordance with local rules for examination on entry level and advanced level at Linnaeus University (Dnr:2011/258). Students at Linnaeus University may receive their grades in accordance with the seven-grade ECTS-scale if they so wish; however, such requests must be made to the teacher at the beginning of the course.

Course Evaluation

A written course evaluation is carried out and compiled in a report, which is archived at the institution. The results and possible measures taken are communicated back to the students the next time the course is given.
