

Course syllabus

Faculty Board of Science and Engineering
School of Computer Science, Physics and Mathematics

4DV010 Projektkurs i språkteknologi, 7,5 högskolepoäng
Language Technology Project, 7.5 credits

Main field of study
Computer Science

Subject Group
Informatics/Computer and Systems Sciences

Level of classification
Second Level

Progression
A1F

Date of Ratification
Approved by Organisational Committee 2009-09-08

The course syllabus is valid from spring semester 2010

Prerequisites
The equivalent of a course in Language Technology at level 2.

Expected learning outcomes

Upon completion of the course, the student should be able to:

- plan a large language technology project including implementation and evaluation
@@design and implement a language technology system evaluate a language technology system @@report the result of a language technology project, both in speech and in writing.

Content

The course gives knowledge about the design, implementation and evaluation of language technology systems, and about the planning and reporting of projects. The main part of the course consists of a practical project carried out by the students in larger or smaller groups.

Type of Instruction

Teaching consists of lectures, seminars and self studies.

Examination

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

On request, students may have their credits translated to ECTS-marks. Such a request must be sent to the examiner before the grading process starts.

Course Evaluation

A written course evaluation will be carried out at the end of the course in accordance with the guidelines of the University. The course evaluation will be filed at the department.

Required Reading and Additional Study Material

Required reading

Relevant literature / papers will be selected together the teacher depending on the nature of the project.
