

Course syllabus

Faculty of Technology

Department of Informatics

4IK10E Examensarbete i informatik på magisternivå, inriktning informationssystem, 15 högskolepoäng

Degree project in Informatics at Master Level, specialization in Information Systems, 15 credits

Main field of study

Informatics

Subject Group

Informatics/Computer and Systems Sciences

Level of classification

Second Level

Progression

A1E

Date of Ratification

Approved by Faculty of Technology 2013-09-11

The course syllabus is valid from spring semester 2014

Prerequisites

General requirements for studies at advanced level and minimum 22,5 credits within the subject area Informatics at advanced level, including the course 4IK024 Information Systems Methodology, 7,5 credits, or equivalent.

Objectives

Upon completion of the course, the student should be able to:

- Formulate and delimit a relevant research problems including research question(s)
- Identify and refer to previous research and theories
- Elucidate, choose and justify relevant research methods
- Plan and conduct an empirical study by using the chosen methods, and show awareness of ethical aspects
- Analyze empirical data and relate to the chosen method, theory and problem area
- Present and discuss the work as well as its knowledge base, both in writing and orally
- Conduct a critical evaluation of the own work and previous research, based on scientific, social and ethical aspects.

Content

The course comprises:

- Formulation of the research area in a Research Proposal
- Identification and review of appropriate research literature
- Data collection and analysis
- Writing a report
- Review and oral opposition of other students' work during the entire process
- Oral presentation of other students' work including oral and written opposition

Type of Instruction

The course consists of independent work, either individually or in groups of maximum two persons. This work is supported by lectures, tutoring and seminars. If the project is carried out in a group, each participant must be able to account for his/hers individual contribution.

Examination

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

Assessment of the student's performance is made through written examination and presentation of compulsory assignments.

The assessment method is decided at the start of the course.

Students who do not pass the regular examination are given the opportunity to a new examination shortly after the regular examination.

On request, students may have their credits translated to ECTS-marks. Such a request must be sent to the examiner before the grading process starts.

Course Evaluation

A course evaluation will be carried out and compiled after the course is completed. The compilation will be presented to the current board as well as to the students and filed by the coordinating department.

Required Reading and Additional Study Material

Required reading

Relevant course literature is selected in consultation with the tutor and the lecturer in charge of the course.
