

## Course syllabus

Faculty of Health and Life Sciences

Department of Biology and Environmental Science

4MX506 Projektkurs i miljövetenskap, 15 högskolepoäng

Project Course in Environmental Science, 15 credits

### **Main field of study**

Environmental Science

### **Subject Group**

Environmental Science

### **Level of classification**

Second Level

### **Progression**

A1N

### **Date of Ratification**

Approved by Faculty of Health and Life Sciences 2014-12-17

The course syllabus is valid from autumn semester 2015

### **Prerequisites**

90 higher education credits in Environmental Science

## Objectives

After course completion, the student shall:

-display knowledge within a specific branch of environmental science, as defined in an individual project plan.

## Content

This course is primarily given for exchange students, and comprises literature studies and practical work within a specified environmental science discipline. The course contents and objectives shall be approved by the course coordinator and course examiner prior to student registration. The direction of the course shall be specified in an individual project plan, which is written by the supervisor, appointed by the course coordinator. The project plan shall be approved by the examiner prior to course start.

The project plan describes the course contents, course literature, learning objectives, examination and shall be signed by the course coordinator, supervisor, and examiner.

## Type of Instruction

The teaching is mainly carried out through seminars and individual supervision, and is further specified in the individual project plan.

## Examination

The course is assessed with the grades A, B, C, D, E, Fx or F.

The grade A constitutes the highest grade on the scale and the remaining grades follow in descending order where the grade E is the lowest grade on the scale that will result in

a pass. The grade F means that the student's performance is assessed as fail.

Examination is achieved via oral and written reports as specified in the individual project plan.

### Course Evaluation

Upon completion, the course will be evaluated by filling out the evaluation form. The result of the individual evaluations are turned into a summary report that will be kept in the department administrative archives. The outcome of the evaluation of the previous year, as well as possible measures taken, will be discussed with the head of department, as well as with incoming students at the start of the next course.

### Credit Overlap

The course cannot be included in a degree along with the following course/courses of which the content fully, or partly, corresponds to the content of this course: 4MX006 Project Course in Environmental Science 15 credits

### Other

Grade criteria for the A–F scale are communicated to the student through a special document. The student is to be informed about the grade criteria for the course by the start of the course at the latest.

### Required Reading and Additional Study Material

Specified in the individual project plan.
