

Course syllabus

Faculty Board of Business, Economics and Design
School of Business and Economics

4NA003 International Migration, 7,5 högskolepoäng
International Migration, 7.5 credits

Main field of study

Economics

Subject Group

Economics

Level of classification

Second Level

Progression

A1N

Date of Ratification

Approved by the Board of the School of Business and Economics 2009-06-17

Revised 2010-06-24. Revision due to translation into Swedish.

The course syllabus is valid from spring semester 2011

Prerequisites

Economics 1-90 credits including at least two of the following courses: Intermediate Macroeconomics 7.5 credits, Intermediate Microeconomics 7.5 credits, Mathematical Economics II 4 credits or equal

Expected learning outcomes

The objectives of the course are to bring knowledge of the present level of international migration, the economic causes of international migration, the economic effects of international migration and the immigrants' economic assimilation in the host country. Besides the course will give knowledge of methods to investigate these causes and effects and the economic assimilation of the immigrants.

Content

The course includes the following parts:

- Description of level of international migration
- The economic causes of international migration
- The economic effects of international migration such as the fiscal effects, the effects on relative factor prices and the effects on economic growth
- The immigrants' adaption to the host country's labour markets. How will the immigrants' employment, occupational career and income develop over time?

Type of Instruction

Lectures and seminar.

Examination

The course is assessed with the grades Fail (U), Pass (G) or Pass with Distinction (VG).

Written examination and writing a paper as well as oral presentations and active participations in seminars. Examination can also be done through project work.

Results are graded using one of the terms Passed with distinction (80% -100%), Pass (60%-79%) or Fail (0%-59%), and A-F according to the ECTS scale.

Students who do not achieve a satisfactory result in the examinations are permitted to make a second attempt approximately 5-8 weeks after the normal examination date. The student will have a minimum of five occasions for written exams in relation to the syllabus to which the student was accepted. Usually 3 occasions per academic year.

Course Evaluation

A written course evaluation is performed and compiled into a report to be kept in the university school archives. The result and any measures taken are communicated to the course co-ordinator and presented to the students participating the next time the course is offered.
