School of Engineering

4SE307 Fördjupningsarbete inom systemekonomi på avancerad nivå,
7,5 högskolepoäng

In-depth study within total quality maintenance on advanced level, 7.5 credits

Main field of study

Total Quality Maintenance

Subject Group

Industrial Engineering and Management

Level of classification

Second Level

Progression

A1F

Date of Ratification

Approved by the Board of the School of Engineering 2011-11-22

The course syllabus is valid from autumn semester 2012

Prerequisites

Basic eligibility, English B and 30 hp courses within total quality maintenance on advanced level, or the equivalent.

Objectives

Ability to conduct an in-depth study in a systematic and scientific way.

In-depth knowledge within a delimited area covered by total quality maintenance.

Content

The course is an independent, in-depth study within total quality maintenance. The study could be in form of a literature study or a combination of teoretical and empirical material. The work should be within a well-defined area covered by total quality maintenance, and lead to in-depth knowledge within this area. Selection of area and aim is made in consultation with the examiner.

Type of Instruction

The teaching consists of tutoring.

Examination

The course is assessed with the grades U,3,4 or 5.

Examination is made on the report and an oral presentation of the findings.

Course Evaluation

A written course evaluation will be carried out at the end of the course in accordance with the guidelines of the University. The course evaluation will be filed at the department.

Other

Some elements of the course may entail costs defrayed by the course participant.

Required Reading and Additional Study Material

Literature list

Literature is selected in consultation with the tutor.
